

Introducing BINDAPT⁺ 2.0

BIN MONITOR AND AUTOMATION DEVICE

Introducing Bindapt+ 2.0 – Your Ultimate All-In-One System – Bin Monitoring and Automation. Elevate your grain management with seamless visibility and control from your phone or home computer. Monitor one or more bins, multiple grain cables, plenum sensors, and grain conditions all with an interactive and easy-to-use interface. One-Click Bin Modes create automated adjustments to the aeration for In-Bin Drying, Cool-Down Hydration and Storage which assist with maintaining or changing the grain condition with ease. The addition of a headspace CO2 sensor to the Bindapt+ system is used as an early indicator of grain spoilage which will alert you up to 10 days before you see a spike in grain cable temperature. Designed to ensure optimal grain quality with innovative technology, Bindapt+ 2.0 offers a clear real-time view of your grain, and control of your bins, from everywhere. Available with both Wi-Fi and Cellular by default, ensuring seamless connectivity on the farm. Control Modules (Aeration+, Heater+, & Exhaust+) can be added to the system to be configured to work with any bin configuration.

FEATURES AND BENEFITS:

Feature	Benefit
Connection Options – Wi-Fi and Cellular	Easy connection with your choice of Wi-Fi and Cellular
User-Friendly – Simple Installation	Quick self-installation reduces setup time and costs
Compatible with Existing Grain Cables	Upgrade from handheld devices to online views and comprehensive monitoring and control system
Visibility and Control on your Phone	Real-time grain, bin, and field views. Simple mapping
Customize Automation, Alerts and Notifications	Set text or email alerts to monitor grain conditions Set automated control of fans and heat from Phone/PC
Expand Monitoring & Automation Options	Additional Sensors (CO2) and Controls (Aeration+, Heater+, Exhaust+) can be added in minutes
One-Click Bin Modes	Simplifies grain conditioning with automated settings to adjust for drying, cooling or storage needs

BINDAPT⁺ 2.0

BIN MONITOR AND AUTOMATION DEVICE

Bindapt+ 2.0 – Full Monitoring and Automation System

The Bindapt+ 2.0 is most versatile bin technology available on the market. Adapting effortlessly to meet diverse grain conditioning needs on the farm, whether its maintaining condition, drying, cool-down or hydrating in the bin. Bindapt's modular design (see image below) drives reliable and efficient performance tailored to the specific demands of each unique conditioning scenario. Bindapt+ 2.0 provides optimal monitoring and flexible grain management options when dealing with different grain types, storage sizes, temperature, and humidity in various environmental conditions.

Included with all Bindapt+ Systems

Customer Service:

Adaptive Agriculture is committed to exceptional customer service, offering dedicated support to assist with any inquiries or issues.

Visual Farm Platform:

Map your farm and manage bin inventory in minutes. No Cost. Intuitive visuals and real-time analytics. Visual Farm is free grain inventory management platform providing detailed insights and controls at your fingertips. Log into our website, app or call for quick set-up.

Adaptive Agriculture is a Saskatoon SK based Ag-Tech company that focusses on In-Bin Monitoring and Control/Automation Systems. Our solutions are used on farms throughout North America to assist farmers with their grain storage and conditioning processes. Our system integrates with existing Bin Cables and is easily installed within minutes.
