COMPLAINT:

27 R&R ON BOARD AIR COMPRESSOR

CAUSE:

CORRECTION:

removed old compressor, removed fittings and pulleys from old compressor and installed on new one, installed new compressor and ran would not make air pressure, removed and cleaned intake air hose and also removed and blew threw output to tank line lines where slightly blocked, ran system and it would make air but no pressure, looked at ccms and it was not the regulating valve, checked what the compressor was putting out at the tank and i could block it by hand, went back and checked right at the compressor and it was the same, looked in deeper and found that one of the screw in block offs looked different, removed it and installed it on the new compressor and all works now. tested and have good pressure coming out of the ports. all okay
