Loaded all the wheels, rim and spacer on trailer, drove back to shop & unloaded trailer.

Reinstalling dual wheels is not recommended - Combine is not designed for dual wheels and issue may reoccur if they are reinstalled.

ADDITIONAL DESCRIPTION:

Parts picked up replacement inner wheel at Combine World. Tire Shop went to farm to change tire onto new wheel. Wheel bolts replaced on both side front tires - need to be retorqued.

DRIVERS SIDE DUALS FELL OFF

CORRECTION:

Loaded up trailer, jacks and blocking.
 Drove to customers location.
 Called the front left duals away from unit to assess
 damages.
 Drilled holes in all 10 broken wheel studs in order to be
 able to drive in removal tool.
 Removed all 10 broken studs, will need to rethread all the
 holes, two holes are damaged beyond repair.
 Called in a front end loader to see if they could lift the
 unit in order to get the tire back on.
 The loader could not lift the unit straight enough.
 Found steel plates to lay down in order to get a solid
 footing to raise the unit.
 Lots of time spent blocking and jacking the unit high
 enough to get the tire and rim on.
 Rethreaded all 10 bolt holes. 2 holes could not be
 repaired.
 Split the duals apart so the tire could be changed.
 Once the tire was put on the rim it could then be put on to
 the unit
 Installed the wheel and rim and torqued bolts.
 Drove the unit up on to blocks in order to remove the outer
 dual on the right hand side.
 Removed the outer dual and spacer ring.
 Removed and replaced all ten wheel bolts on the right inner
 wheel and torqued bolts.
